On the keyboard 'I' is for information and 'Q' is to quit.

Below is the keyboard hotkeys to rotate specified faces.

Wait until a rotation animation is completed.

S is the initial visible face.

For example, to rotate the right face, we should choose D because the initial face is S.

```
        W
   A    S    D    F
        X
```
